

L- and K-band analysis of the Galactic center object G1

Maria Melamed
and Lena Großekathöfer

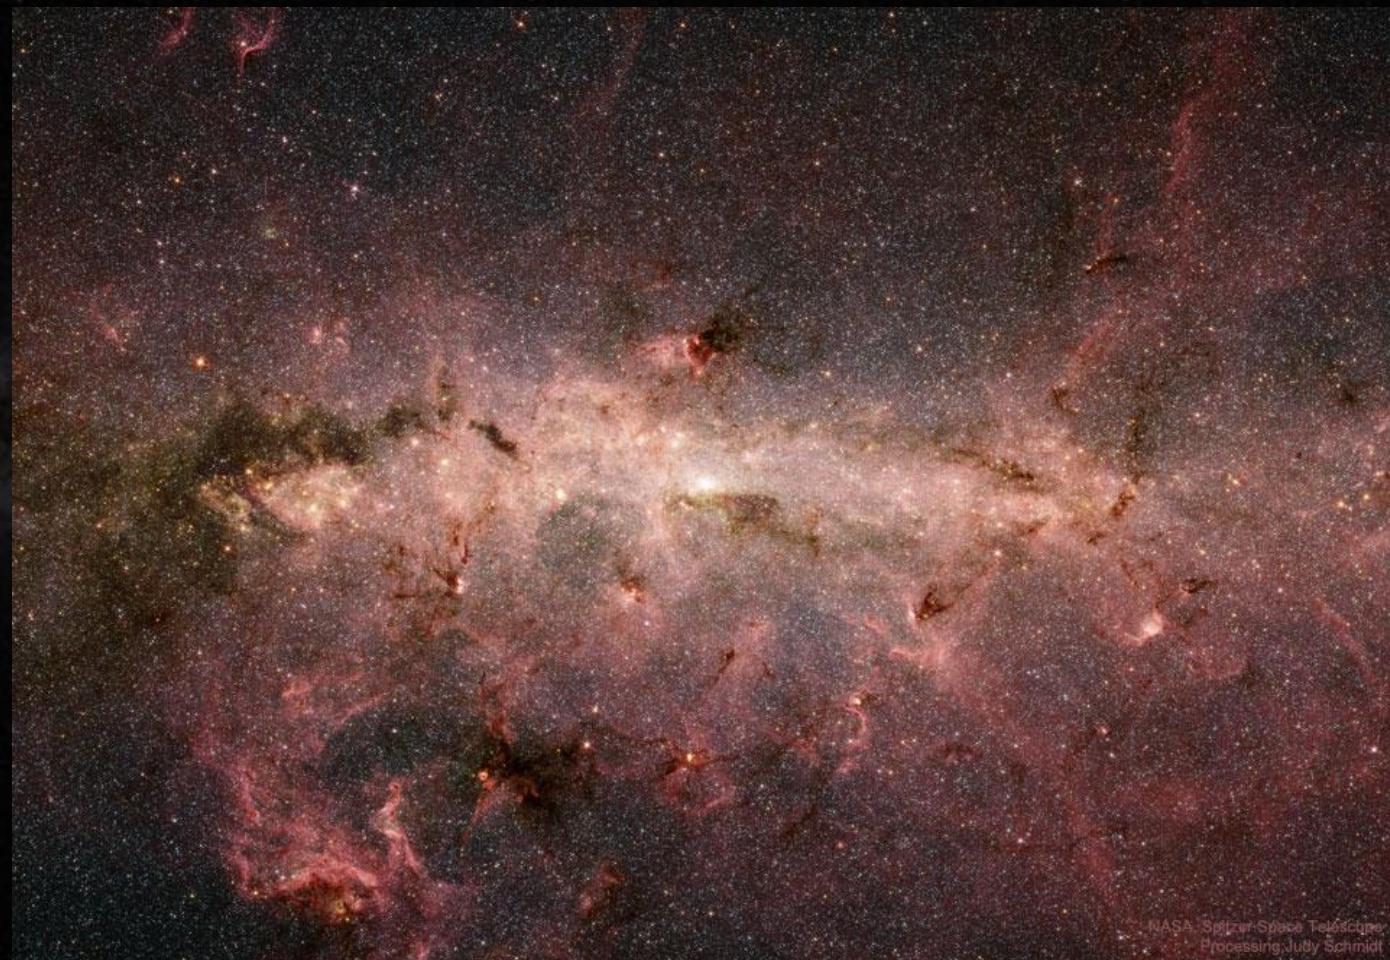

The Galactic Center

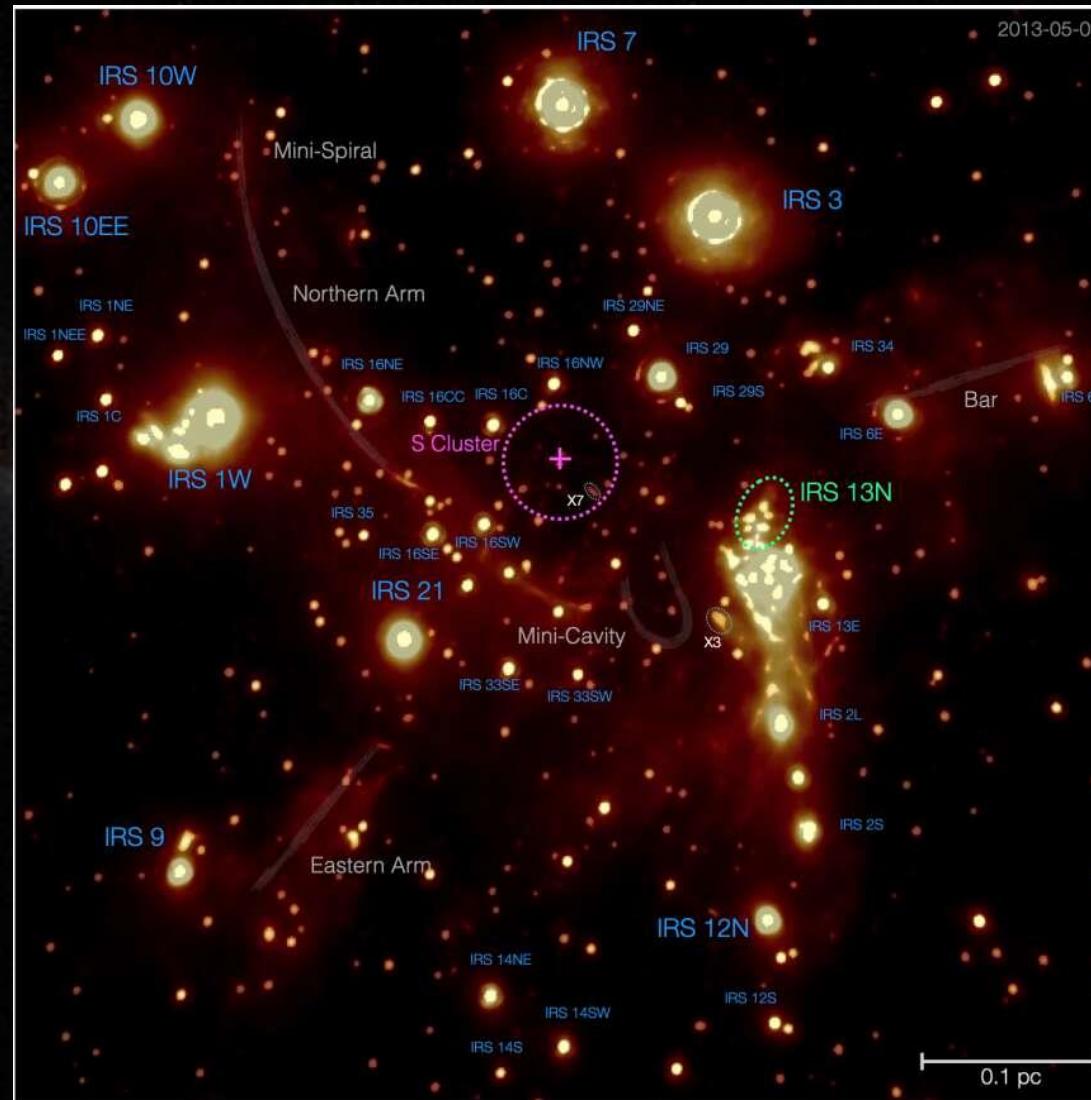

...in optical wavelengths

The Galactic Center

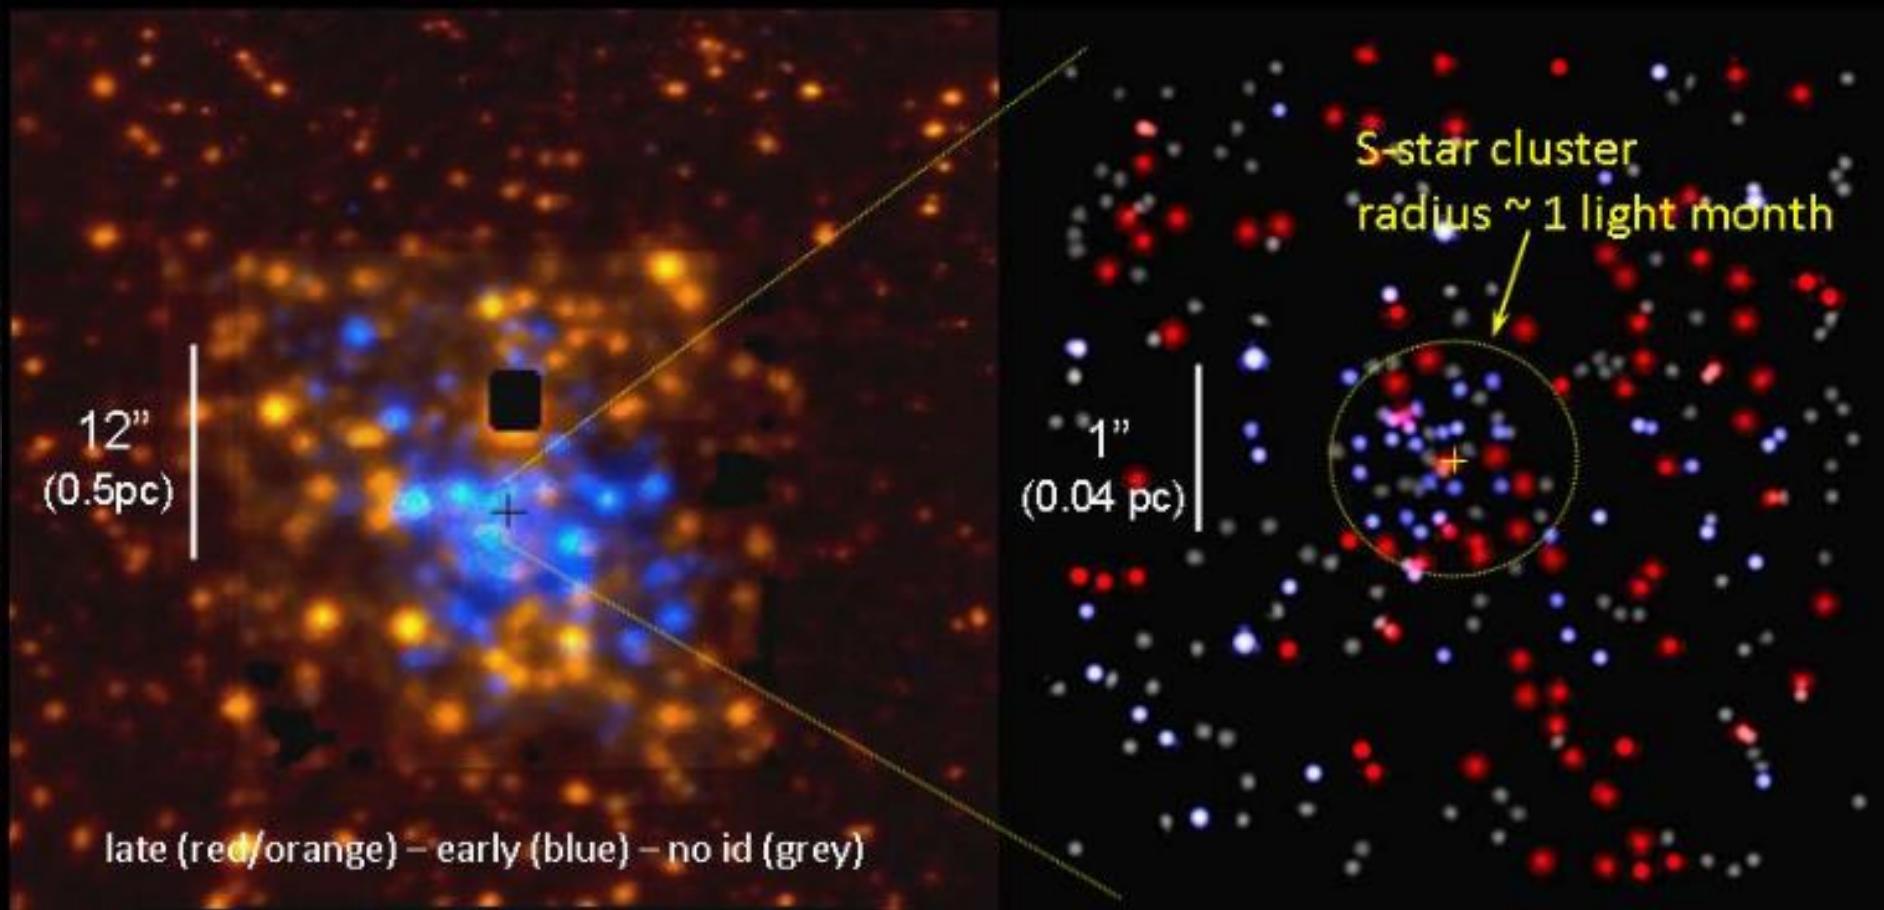

...in infrared

The Galactic Center

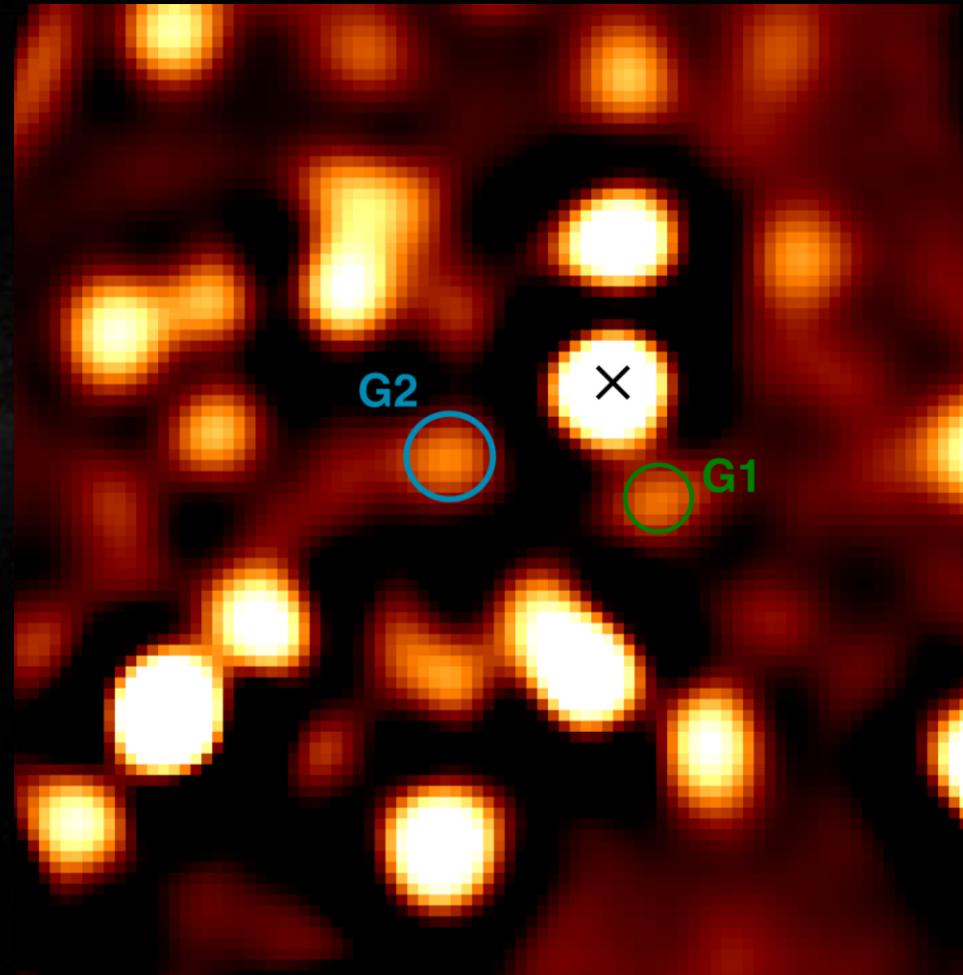

The S cluster

G2/DSO

- Showed simulation can be downloaded here:
- https://www.mpe.mpg.de/resources/pgn/g2/data/gcm_with_title.mpg

And what about G1?

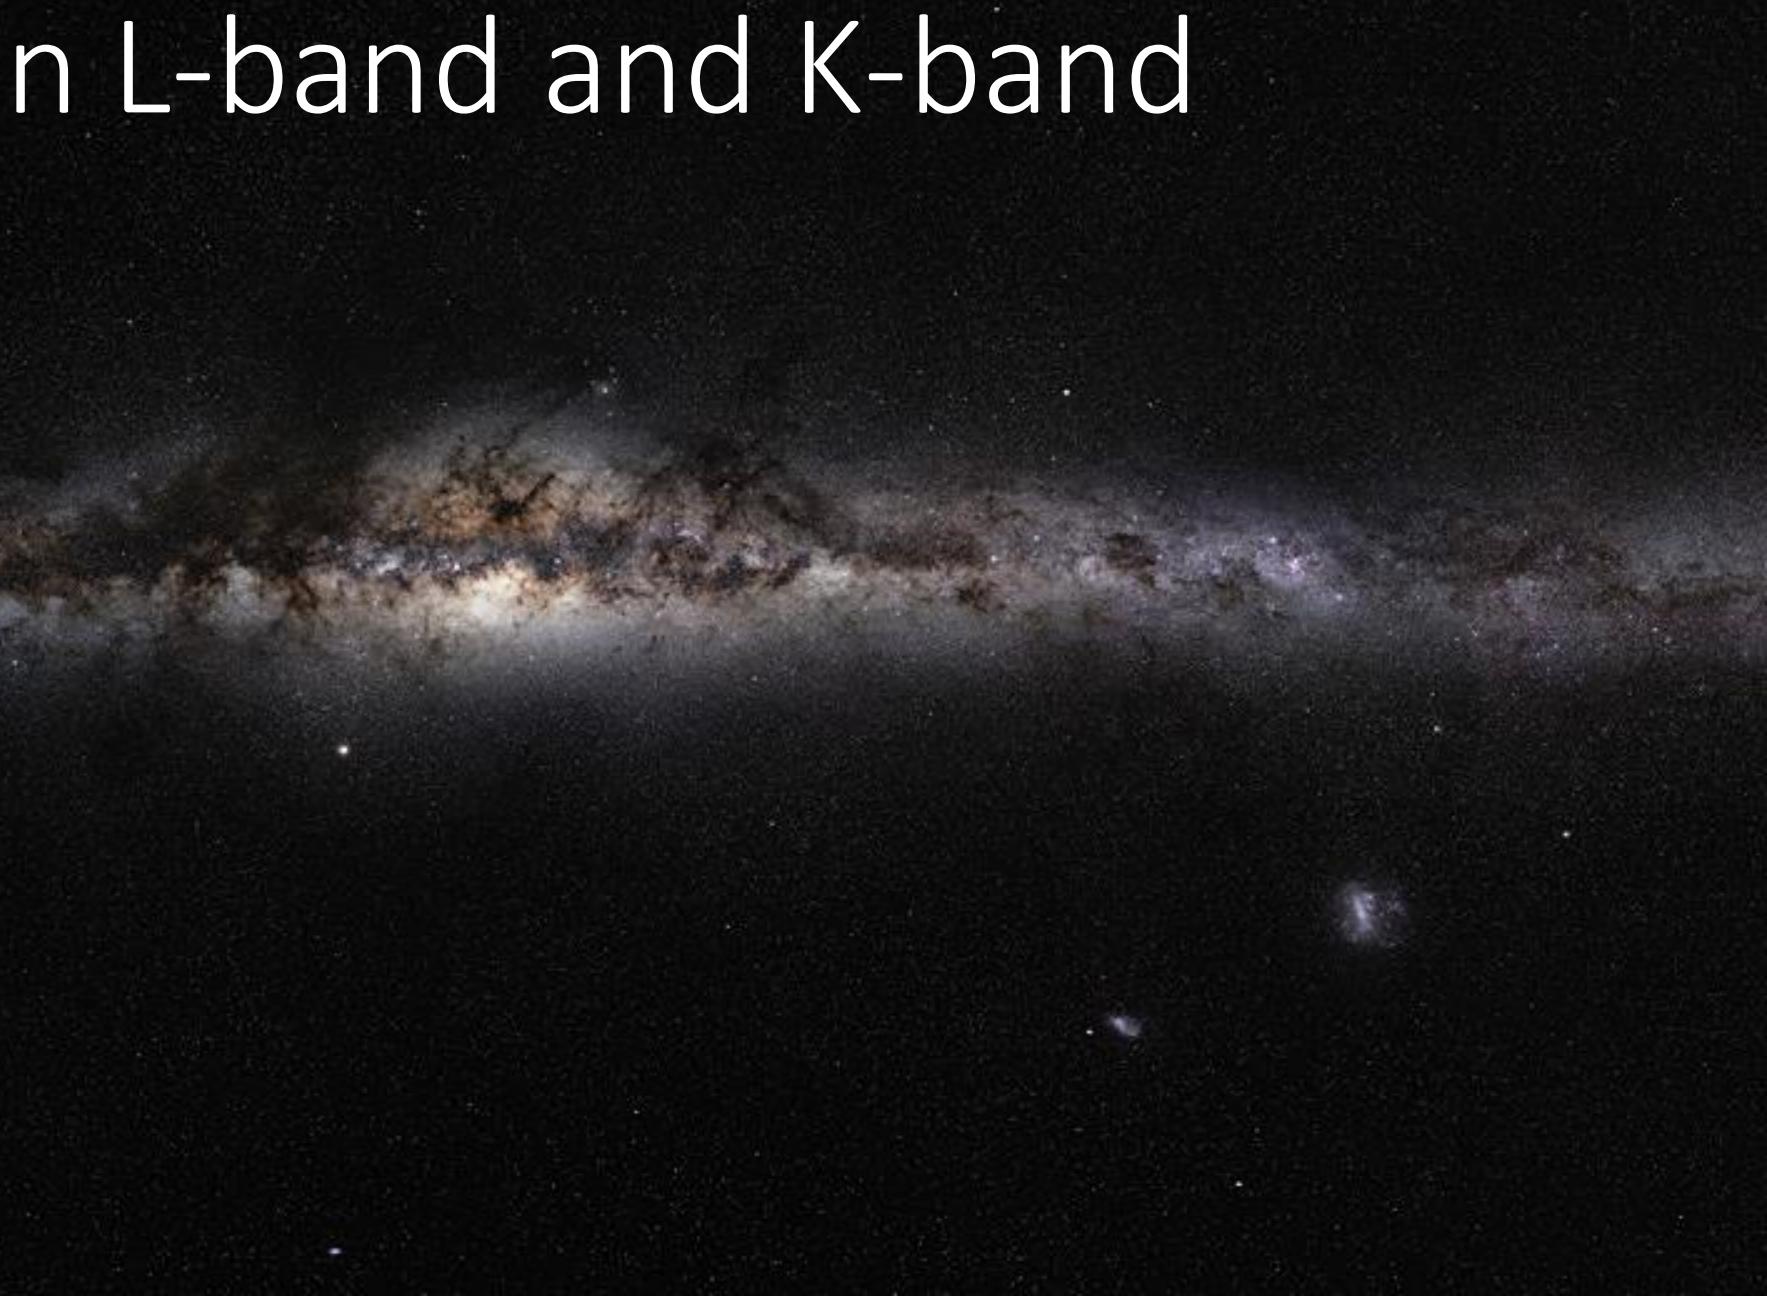

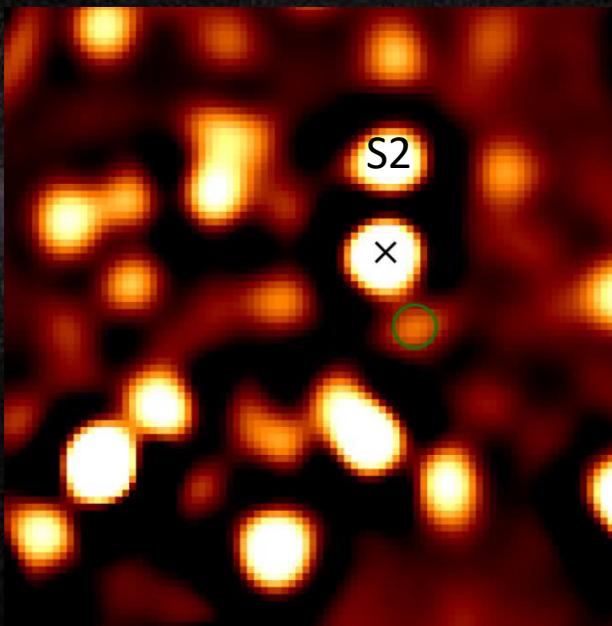

L-band in 2008.4

VLT and our data

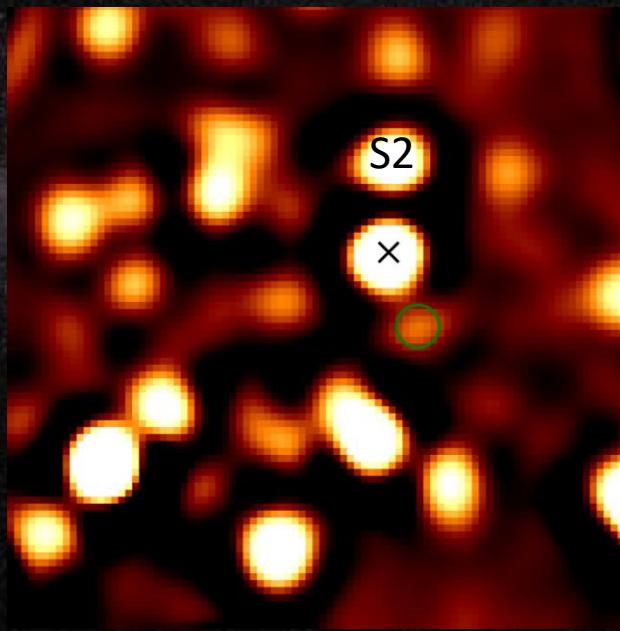

G1 in L-band and K-band

2008.4 L-band

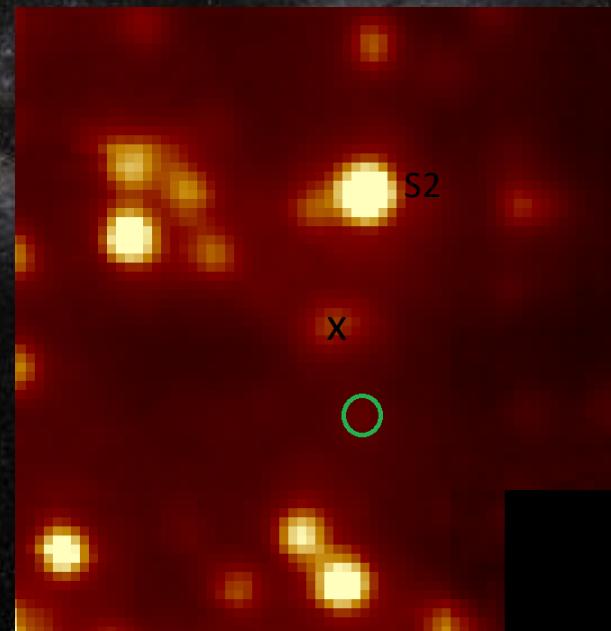

G1 in L-band and K-band

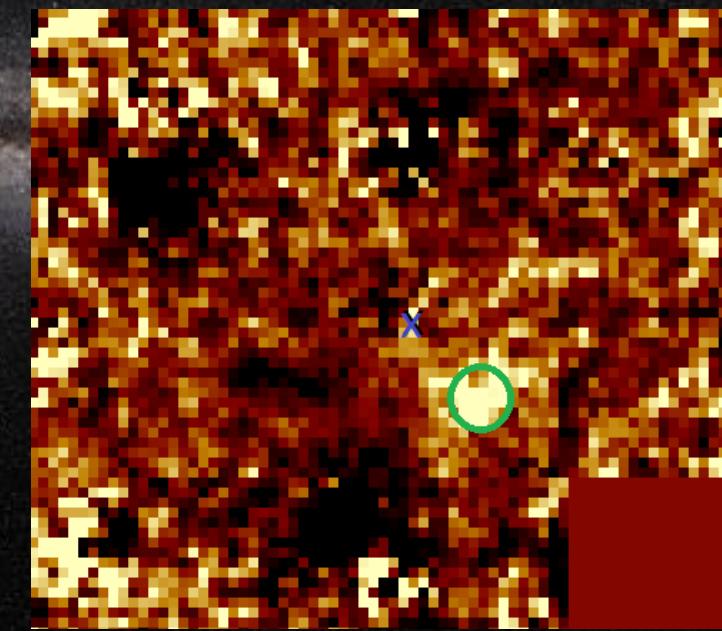

2008.4 L-band

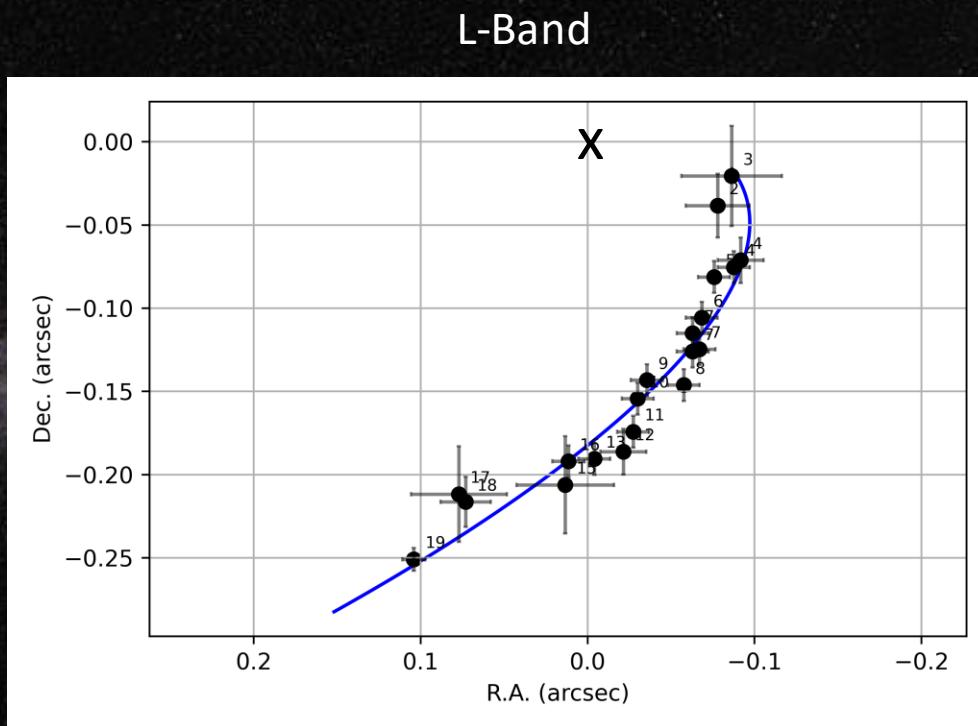

2008.2 K-band continuum

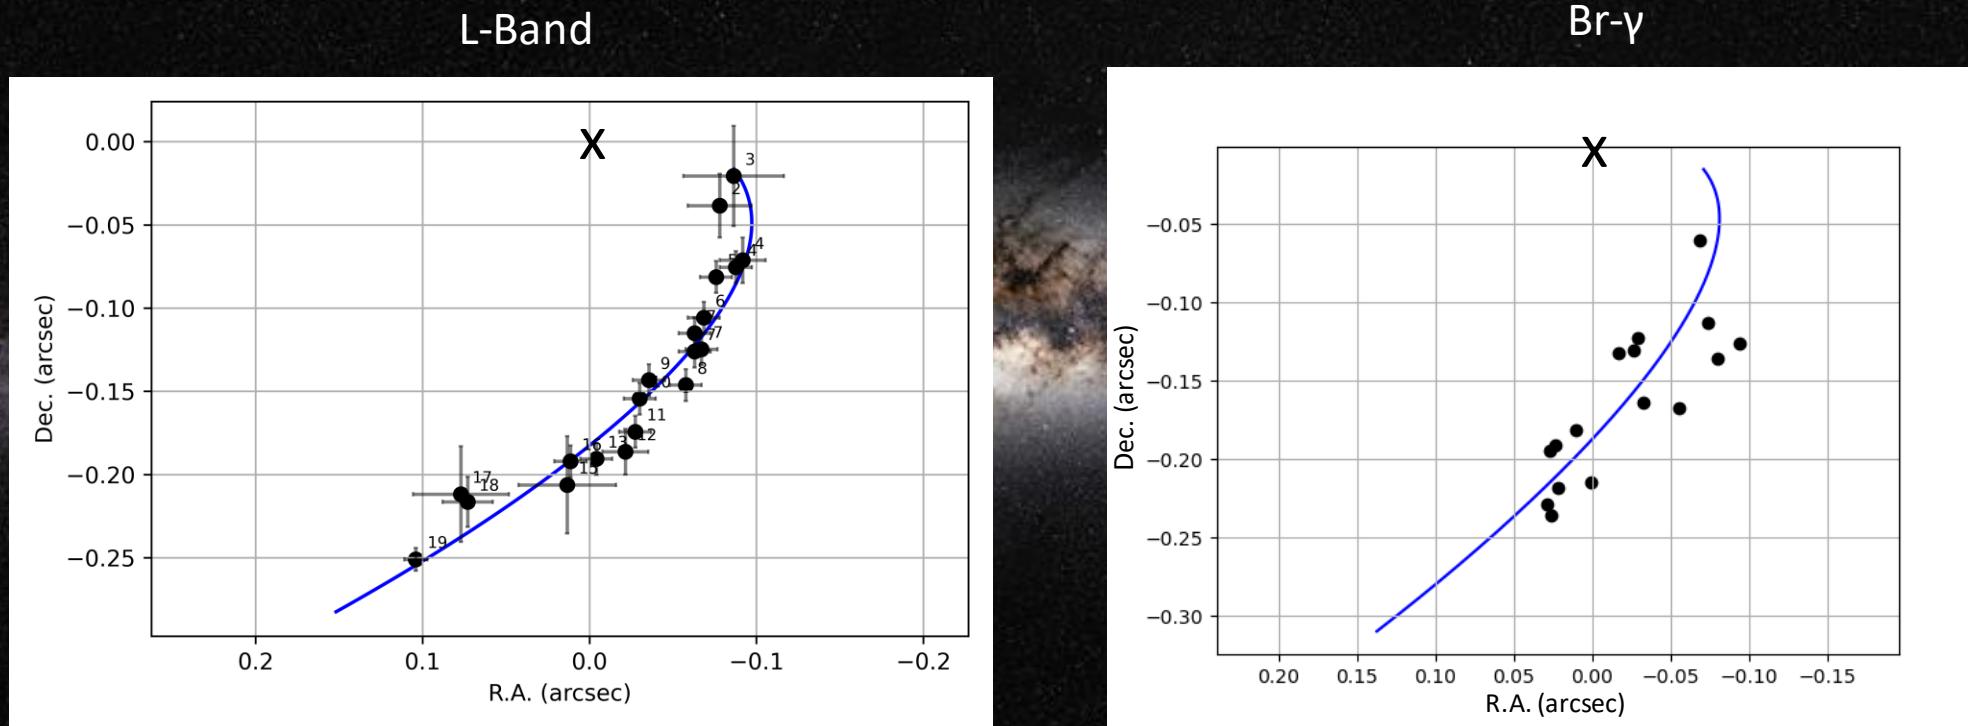

2008.2 Br- γ

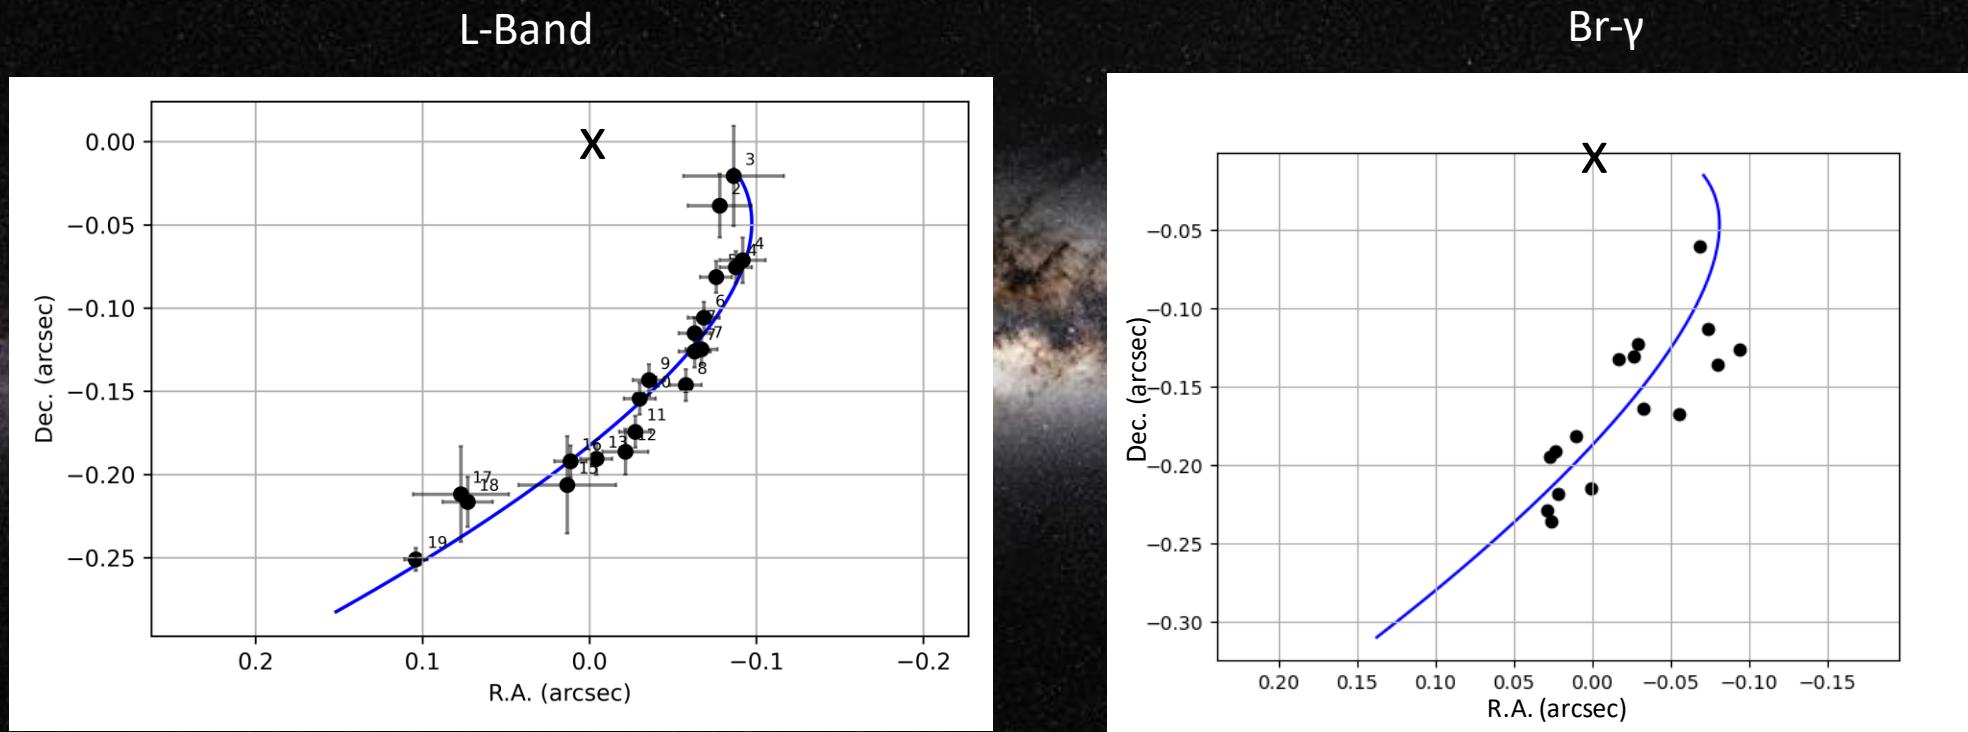

The orbit of G1 in the L-band and Br- γ

The orbit of G1 in the L-band and Br- γ

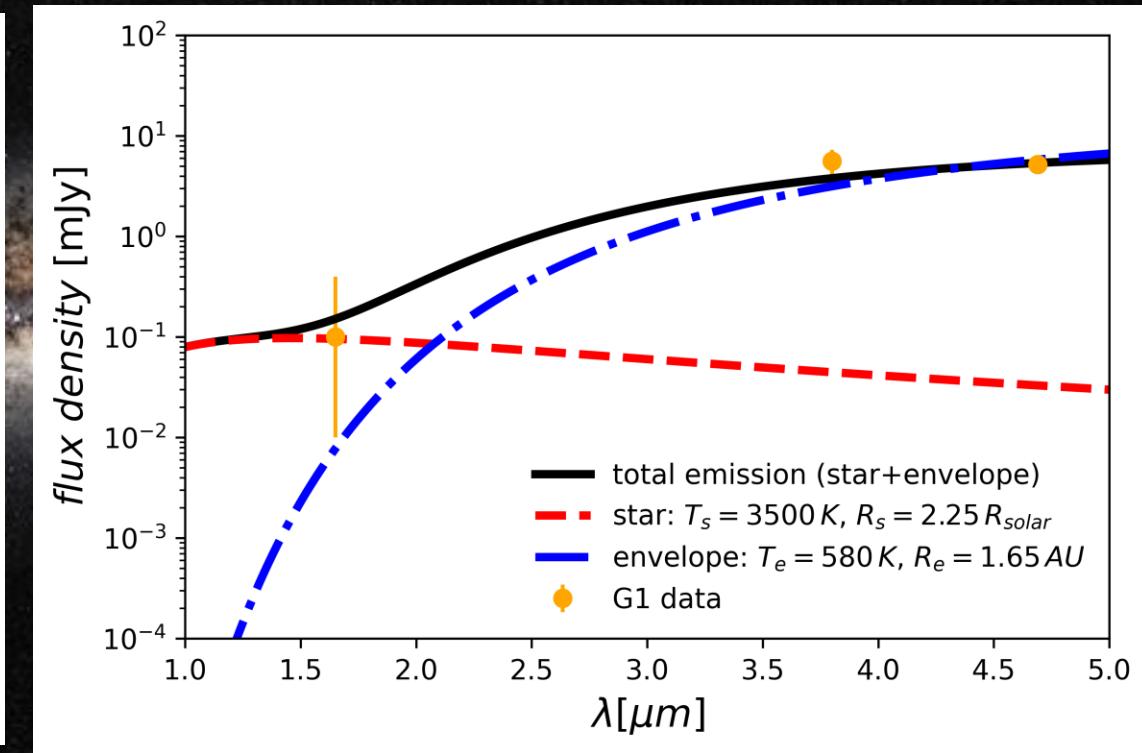

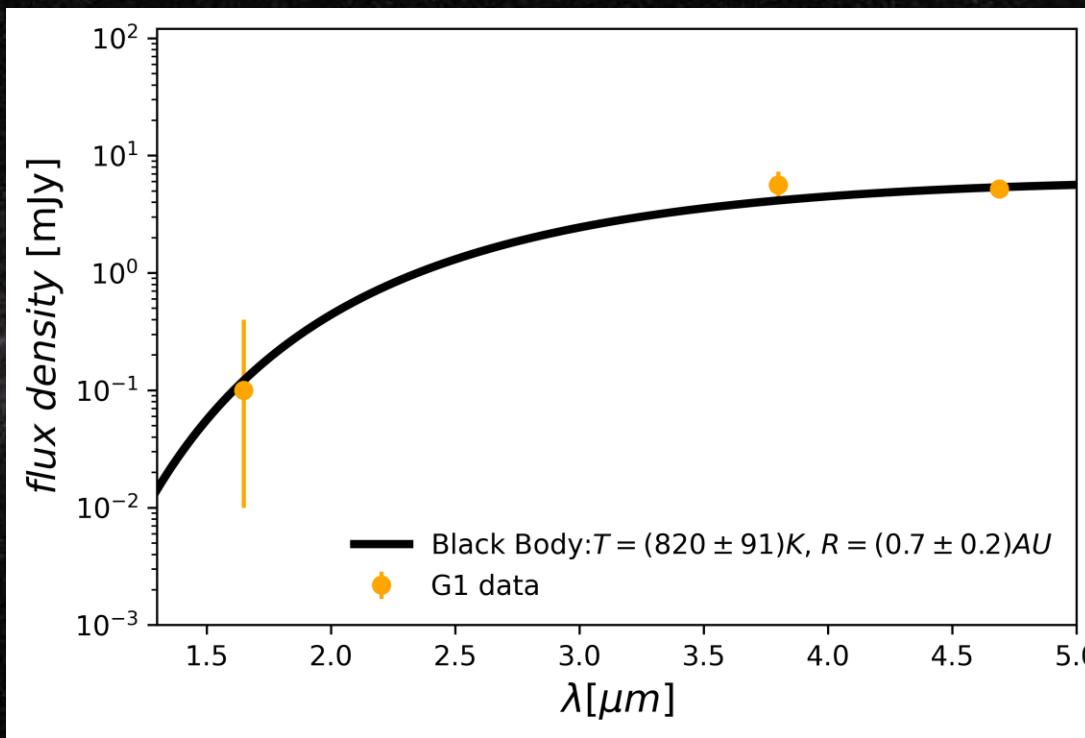

The orbit of G1 in the L-band and Br- γ

	a[mas]	e	i[rad]	Ω [rad]	ω [rad]	T_p [yr]
L-band	48.55053	0.94859	1.95681	2.19981	1.48483	2000.96494
Br- γ	48.61286	0.96853	1.9050	2.03183	1.575095	2001.0210

Spectral Energy Distribution

Outlook

- Verify orbit from L-band with gas emission from Br- γ line
- Identify G1 in K-band using a high-pass filter to verify the orbit again
- Find magnitude of G1 in K-band to complete the SED analysis
